

Union Pacific club-lounge car 1518 (right side) as modeled from #173-567 in N-scale by Dallen Schowe in mid-2010. This is one of seven cars remodeled to club-lounge cars from 5200 series chair cars in 1947 for use on UP Streamliners. This car, 1518, is as it would have appeared in the early 1950's on the Los Angeles Limited as a first class lounge was placed between the diner and the first sleeper.
