

Summarized Comments from Jamison Jordan:

These are HO scale models of two BNSF Executive Train cars made from the GN #173-13 "Pass" and #173-11 "River" series sleeper Brass Car Sides. All I did was Krazy Glue the sides to old AHM coaches, which I used a Dremel tool to modify. I mixed Badger Scale BNSF Green with black for the green and Testors Panzer Interior Buff with white for the cream. I used regular Gloss White for the roof. Microscale makes the decals. After I put all of the decals on, I gave the cars a few layers of Plasti-Kote lacquer to shine them up a bit.

The "Pass" Sleeper is named "Jefferson Pass", and is road number BNA-21, originally GN 1375; the "River" Series is named "Stevens Pass", and is number BNA-22, originally GN 1260. I used pictures from <http://www.trainpix.com/BN/INDEX.HTM> to find out where the decals go.
