

From Sid Dawson regarding construction of Milwaukee Road #610 coach in UP scheme.
Received July 1, 2013.

Dennis: Thought I'd share one of your offsprings with you. Attached is a Milwaukee Road coach #610. ALM core kit with BCS sides and Kato interior. I added roof detail. The ribbing is .010 wire. I made the AC cover from .020 styrene, the roof vents are ALM. The decals are Streamstyle (very nice decals, a bit pricey). Hope you like the car, I sure do. It's for my 1958 (so it can run dome-coach) COLA I just finished.
